Application

- MCD is an individual drying tool for small quantity of cones yarn or hank yarn after dyeing & finishing.

Highlights

- CrHeat means centrifugal hot air heating mechanism, accelerated fast drying than traditional hot air drying.
 - Auto reference to dry alarm setting.
 - Avoiding danger of overdry causing color change, even melt or burnt.
 - Inside-out and outside-in hot air bringing both inside & outside cones layers with even hot air penetration.
 - Energy saving and environmental improvement with exhausted heat recycling to external hot air generator HG.
 - Color display controller providing condition setting and monitoring.
 - Safety devices for both pressure and temperature.
- Option :
- Different types of sample holders is on request like hank yarn.
 - Dehumidifier chamber is an supporting facility to fast cool down the package yarn after drying.
 - MCH package yarn hydroextracter is also an simple facility before drying.

Specification / model 规格型号:	MCD
Option heating device 选项加热装置	Hot-Air generator HG power 3P-7.5kw
Machine Voltage 机台电压	1-Phase AC220V, 50/60Hz
Machine Current 机台电流	12A
Machine Power 机台功率	2.5KW
Machine dimension mm 机台尺寸	approx.W1210 × D860 × H860 mm
Machine net weight kg 机台净重	approx.130kg
